**Lower Shipping Costs—Fewer Losses—  
with this new Andrews Hosiery Container**

## The Andrews Rawhide Case

The newest addition to the Andrews line. Originally designed for the hosiery trade, but rapidly being adopted by many other trades for shipments between 90 and 200 pounds. Ideal for shipping knit goods, corsets, towels, bath robes, blankets, thread, ribbons, curtains and practically all other

textiles. Substantially built of solid fibre, with a shock-resisting frame of sturdy lumber. Cheaper and lighter than wood—will enable you to cut down materially on your container expense and on shipping costs. Impossible for pilfering to occur without detection. Takes up little room in your plant—shipped to you knockdown and assembled as needed.

### Here Are The Features You Have Been Looking For in a Hosiery Container:

1. Weight, one-third less than wood, resulting in an immense saving in freight (especially on shipments of 110 pounds or over in territories where freight is charged on a 200 pound basis).
2. First cost much less than for wooden cases.
3. Pilfering impossible without detection, eliminating a serious source of loss.
4. Smooth-surfaced fibre sides, top and bottom make paper lining unnecessary.
5. Excellent printing surface.
6. Absolutely dust proof, and fully protects the finest fabrics.
7. Easier and cheaper to handle and assemble

- than wooden cases—saves two-thirds of the time of your workmen.
8. Not injured by warping and twisting in storage—when nailed the sides, tops, bottoms and ends fall naturally into their original places uninjured.
9. Interlocking feature supplies maximum strength and prevents theft.
10. No splinters in hand while assembling or handling.
11. Neat, attractive appearance.
12. No dimension limit—may be made as large as desired provided case and contents do not exceed 200 lbs. in weight.

This illustration shows detailed construction of frame, which is made from strong, light-weight lumber.

**Note:** Andrews Solid Fibre and Corrugated Fibre Containers will always remain the standard shipping case where the freight limit is not above 90 lbs. Ask for information and prices on these containers.

*Get full Information  
and quotations NOW*

Let us give you, in detail, the complete story of the Andrews Rawhide Case. Let us point out to you why it is to your interest to put this case into immediate service in your shipping room. Tell us your needs as to size and possible quantity—we will send you quotations and illustrated folder by return mail. There is no obligation. Write today.

## *The Result of Continuous Care*

"One hundred ninety-one firms reported a total of 24,736 employees engaged in the manufacture of coal-tar products, 2,605, or 10.5 percent, were chemists or engineers. This is probably a larger proportion of technically trained men than will be found in any other important manufacturing industry in the U. S."—*United States Tariff Commission Report.*

The reason for this preponderance of technicians is that each step in the intricate synthesis from the lump of coal to the brilliant dyestuffs must be under the constant observation of chemical engineers.

Coal-tar dyestuffs are the final effect of months of tedious laboratory research coupled with more months of semi-commercial experimenting and the last stage of actual plant production. Each step has its ever-watchful chemist, for the greater the care the better the dyestuff.

Du Pont Dyestuffs are what they are, because some 4,000 earnest workers labor for their excellence, and of this number 470 are chemists or technically trained men.

## Here's a Gilt-edged Investment: *A Satisfied Employee*

A satisfied employee is always a good investment.

Contentment among workers, at home and on the job, means bigger and better production.

And contented employees stick—breaking in green hands is expensive at best.

These are some of the advantages which The Ware Shoals Manufacturing Co. of Ware Shoals, S. C., had in mind when it wrote as follows of the operation of its American Mill Village Laundry:

"The laundry you equipped and installed has not only proved a great convenience to our people by giving them an opportunity to get their washing done in a satisfactory manner at a low cost, but it has also been a great

benefit to the mill in these times of labor scarcity by giving a number of women the chance to work regularly who were forced to stay out one or two days a week to wash, before we had a laundry."

American Laundry specialists designed the Ware Shoals Mill Village Laundry; American construction engineers supervised the installation; American demonstrators trained a crew of operators and made them skillful.

The reward of such thoroughness is a Mill Village Laundry which is delivering the service promised and more.

And Ware Shoals satisfaction will be your satisfaction when you have restored wash-day to your productive calendar.

It will cost you nothing to investigate the American Mill Village Laundry.

Write today.

**The American Laundry Machinery Company**  
*Specialty Department N* CINCINNATI, OHIO

## *Textile Products Show at Greenville, S.C.*

The Southern Textile Association, an organization composed of superintendents and overseers of Southern cotton mills, in the year of 1915 conceived the idea of having an exposition in Greenville for the purpose of showing cotton mill machinery and appliances. Arrangements were made with the Piedmont & Northern Railway to use an unoccupied warehouse on Washington street, and the demand for space was so great that five adjoining floors in the warehouse at the rear were required to house the exhibits. It was a great success, and the committee that had it in charge was so much enthused that they formed a corporation known as the Southern Textile Exposition, Incorporated. B. E. Gerr, who is one of the best known of Southern manufacturers, president of Judson Mills and other mills, was president; Capt. Ellison A. Smyth, who is the dean of manufacturers in the South, president of Pelzer Manufacturing Company, and other mills, was vice-president; Edwin Howard, Southern agent of the Mason Machine Works, was treasurer, and G. G. Slaughter, a well-known representative of machinery and supply houses, secretary. The directors were composed of men identified with the textile industry.

Textile Hall was the result of their labors. The second Textile Exposition was held in the hall in 1917; another in 1919, and the fourth last year. The fifth will be held in October, 1922.

The directors of the corporation have been so much encouraged by the attendance from the north and east by people interested in the textile industry at these four big shows held here that shortly after the last exposition they began to consider the question of holding another sort of exposition. After a great deal of discussion and writing of letters to friends in the north and east and conferring with Southern manufacturers, it was decided to inaugurate in the fall of 1921 and every second year thereafter what will be known as the Textile Products Show. The first class will be goods made from cotton and from silk will be shown, and the exhibitors will be the manufacturers through their commission agents or directly, if they prefer. The latter are entitled to exhibit cotton or silk goods made anywhere in the United

States, as we are not limiting it to the South.

Another branch of our show of equal importance will be knit goods. Anything made from cotton yarn is eligible for this exhibit, such as sweaters, hosiery, underwear, etc.

Third are the things that are made not from the cloth by hand of machine, but manufactured products, such as automobile tires, tubes, shoes, slippers, etc. We have asked one of the largest makers of collars to install in this show a complete collar making branch of his establishment showing the cutting, sewing and making of the collar complete. We hope to have people hemstitching, manufacturing embroidery, weaving ribbon, and making all kinds of knit goods in the building.

We hope the commission houses will show every variety of cotton cloth from canvas to the finest dress materials. We are now making some silks in the South, but we will be pleased if agents will show other silks.

Another interesting branch of the show will be the things that are made from yarn and cloth but not having the appearance of either, namely: writing paper made from macerated cloth and yarn, ivory pyralin and other products made by the DuPonts. We have taken all the textile papers and from them have compiled a directory of producers of the various things mentioned above. To all of these we will address a copy of our prospectus, and a letter inviting them to make an exhibit. Our success with the Textile Exposition leads us to feel we will have more applications for space than we can accommodate at the price of \$1.50 per square foot.

The show will be opened on Thursday morning, October 6, 1921, and will continue until Saturday night, and reopen on the following Monday morning and continue through to Wednesday night, thus giving six days of exposition with a Sunday between. The idea of this is to give the exhibitors a chance first to get ready the first three days of the week, and then to rest and renew their strength for the last three days of the show.

The hall, representing a replacement value of a quarter of a million dollars, will be decorated in a manner which will be unique and appropriate to this the first great ex-

position of the products from Southern cotton products and fields.

The question that may be forming itself in your mind is whom do we expect to interest in coming to see this exposition, because unless we can show to the prospective exhibitors that there will be a large number of people here we could not expect them to pay their money for exposition space. Our visitors, as we see it, will be divided into four main groups.

First, in order to gain the support of the manufacturers, we will call their attention to the stimulus this show will give to our export trade. We will have as exhibitors not only those named above, but also concerns who make all kinds of containers for packing and shipping, concerns who manufacture stencils and other marking devices for export trade. We have enlisted the attention and assistants of foreign and domestic commerce, the export committee of the New York commission merchants, the Association of Cotton Textile Merchants and some of the large New York banks. These banks particularly will help us for the reason that they have representatives in foreign importing cities. Through them we will distribute our advertising matter and particularly ask them to bring importers to the show by arranging for their transportation to Greenville and thence back to New York. We will meet them at the train, have a committee to look after their wants while here and entertain them in the proper manner entirely free of charge. Through this we hope to interest particularly South and Central American importers. Our advertising leaflets which will be sent to the Southern buying centers will point out this is the first opportunity these purchasers have had to get in direct touch in one day with the manufacturer, the commission agent, the man who makes the package for shipment, the man who makes the marking device, and the banker who handles the drafts and documents and all the credit arrangements. In this way it would tend to iron out any misunderstanding which now stand in the way of developing our foreign trade.

Another reason why Greenville should attract these foreign buyers is that it is the only place in the world, so we are informed, where

cotton can be seen growing, where it is ginned, spun, woven and bleached and made into the finished garment in one town. A visitor who has never seen these processes can see it all in a few hours, and with the added advantages shown above it seems to us it should attract some representatives of foreign importing houses.

Our second group of visitors will be the manufacturers themselves, and the commission men, and others interested in the textile trade who will certainly not lose this opportunity to get what information is obtainable in a gathering of this kind. We will send out an invitation to the heads of cotton mills not only to come themselves, but to bring their superintendents and overseers. We will appeal to the latter class on the ground that it should tend to develop in them a higher appreciation of the craft to which they are engaged. They will see the possibilities of the manufacture of cotton as they have never before. They will see what the other fellow is doing, and we believe that the added devotion they will show to their labor will so reflect itself in the improvement of the character of work done on the fabrics passing under their hands that it will have the effect of minimizing cancellations for defective goods and workmanship. Our Southern cotton operatives are improving greatly in personnel. At the last Southern Textile Exposition we found twenty-two overseers from one mill who had been sent here by that company to see what new machinery was being introduced, and how it was being manipulated. We believe that our plan of inviting the workers will mean that the executives will come themselves. It is these people we wish to meet the importers and visiting merchants.

The third division whom we hope to interest are the wholesalers and large merchants in the district south of Chicago, east of the Mississippi and through the far Southwest. Of course, we would like to have all people interested in dry goods and textile matters come, but particularly do we hope to get the people in the neighborhood of St. Louis, Cleveland, Louisville, and on through the South and the great Southwest. They can come here via Chattanooga and Atlanta, as we have coming into Greenville the Southern, Atlantic Coast Line and

Seaboard Air Line Railways. We hope to reach these people by advertising in the great dry goods papers, headed by the Dry Goods Economist, which we are happy to say has endorsed our proposed show. I may say that every publication in the United States affiliated with cotton manufacturing, so far as I know, has also endorsed it. We hope, through these influences and every other source at our command, to get a large number of merchants to see this wonderful collection of textile fabrics and products.

We have been told by some of our friends they thought a show of this kind might be held in New York, but our answer has been that as our purpose is mainly to increase export trade and promote the friendly relations between wholesalers, jobbers and retailer, with the commission men and manufacturers, that the exhibition should be held here. And again, it is far away from the competitions and antagonisms of the big city, and it will be found that in coming down here and getting away from New York a lot of people will get together who never would fraternize there. Besides it is perfectly natural that the merchants of whom I have spoken above, should stop over here for one or two days on their way to markets in the fall of the year, because they are going to meet here the representatives of all the big dry goods interests. We have also been assured of the support of the leading commission men in the Worth Street District.

The fourth classification of our exhibitors will be the public at

large. It is difficult for us to record in a general statement all the people we do expect, but we know we will be able to attract many to this show who will undoubtedly be future patrons to those who make exhibits.

#### Knit Goods Men Meet in March.

The third semi-annual convention of the Sweater and Knitted Textile Industry will be held at Philadelphia, March 24 to 26, it was decided at the monthly meeting of the Sweater Manufacturers at the Manufacturers Club, Philadelphia.

According to the report of the meeting, convention headquarters will be located at the Hotel Adelphia, which also will be the official hotel for visiting delegates. The business sessions of the meeting will be held in Philadelphia March 24 and 25. While in Philadelphia the delegates will be invited to visit a few of the most modern textile mills, and there will be other features including a dinner at one of the leading clubs to which all the spinners, machinery dealers and supply men in general will be invited.

On Friday, March 27, the entire delegation will proceed to Atlantic City, where a number of novel publicity features will be shown. There will be a fashion revue, swimming pool features, a sporting meet tableau and others not yet definitely decided. The Pennsylvania district has appointed a committee to work in conjunction with J. W. Lindau, Jr., director of national publicity, and the Publicity Bureau of the

Chamber of Commerce of Atlantic City has promised its co-operation.

The balance of the meeting at Philadelphia was given over to Mr. Lindau's report on the new publicity campaign. Mr. Lindau stated that while in former campaigns large appropriations had been asked for, the contribution needed in this campaign amounted to only \$1.93 per week for every \$100,000 worth of business done yearly.

In addition to using all the leading trade papers as media for dissemination of publicity, there will be, according to Mr. Lindau, no newspaper of any consequence that will not carry a fashion talk on knitted outerwear, written by fashion experts, who are the fashion editors of leading New York dailies, all of which, he stated, will create a strong style tendency toward knitted outerwear.

Some of the features of the new publicity campaign, according to Mr. Lindau, besides the use of trade journals and prominent dailies, will be the circularizing of retailers, jobbers and selling agents, an educational campaign among retail clerks and a booklet attached to each garment containing instructions pertaining to its proper care.

Mr. Lindau emphasized the fact that the knitted outerwear industry has grown from an output of 60 millions in 1914 to 290 millions in 1920, and that this result has been accomplished practically without any advertising, as there are only 16 national advertisers among the 1,200 manufacturers in the industry.

#### Hope Still Strong in British Mills.

Manchester, England.—The new year was entered upon with depression prevailing throughout the industry, not a glimpse of optimism anywhere, and at the end of six weeks conditions are just about the same. And yet the past month must be called disappointing. Sounds anomalous, but it is true.

The fact is that the year had hardly opened when there was an unexpected rustling among the dry bones of a dormant demand. Inquiries began to come in and cloth buyers began to find some attraction in the exceedingly low range of prices and from inquiries proceeded to real operations. Cotton, which closed 1920 at the lowest level of the year, took a turn and in a couple of weeks recovered nearly twopence per pound in American, and the spot sales in Liverpool for the week ended January 14 reached the surprising total, of 32,210 bales, the largest spot business since the week ended October 29 last year.

The first impulse came from America in the shape of reports of a revived demand for cotton goods, of operatives willing to accept reduced wages to help manufacturers to meet it and of mills resuming full time. Both Manchester and Liverpool took heart and proceeded to act and react upon each other.

It was not much of a foundation to go upon, but to people weary of waiting it was enough for a start, and the response was indicative of the readiness of the general trade to respond to anything in the shape

## Hosiery Black

Two of the most important qualities in dyes for hosiery are fastness to perspiration and fastness to washing. These qualities are assured by using

### "National" Diazine Beta Black N

—a dye that has proved indispensable for quality hose.

**National Aniline and Chemical Co., Inc.**

General Offices

21 Burling Slip

NEW YORK

of a favorable factor. For some ten days there was quite a fair amount of business in progress. China, quiescent for some time, awakened up and bought shirtings, bleaching cloths and specialties from stock at very low prices, and ventured even to place forward orders also at low prices. India did a fair amount of business at bargain counter rates in dhooties, jaccnets, other light weight fabrics and printing cloths, and from other quarters there were signs of livelier interest. It does not appear that manufacturers sold ahead to any extent, but a number of cheap surplus stocks were cleaned up and a number of price irregularities removed. Some yarns improved quite 2d per pound in ten days.

Then cotton began to weaken in America and here and day after day declined until all the previous improvement had been lost, and from the first check the situation in Manchester changed. The demand dropped off almost perpendicularly. The stiffening was taken out of the backs of sellers and prices lost whatever show of improvement they had made. It is quite clear that if the trade are so anxious to make a start that they come out under a little encouragement, they are nevertheless so timid that the first rebuff sets them back again.

The past four weeks have been exceedingly dull ones in Manchester. Whatever business has been put through has been practically at buyers' prices and as cotton has declined these have more and more dropped back and with the exception of a few special instances only

those sellers who have been willing to sacrifice stock lots or book forward below present production costs have made any headway.

Some weaving mills have resumed full time working; that is because they spin their own yarn or have been bold enough to take a sporting chance rather than shut down, but there has been nothing so far to encourage spinners to abandon the concerted short time working. This is being continued in both the American and Egyptian sections, with the situation in American to be reviewed a month from now and in Egyptian at the end of a fortnight. The American section is working 24 hours per week only and the Egyptian 35 hours per week, and yet the output is in excess of the demand. The mere statement is more impressive than an elaboration. Taking 32s twist as the standard, American yarns today are less than one-third the highest price last year, say 20d per pound, against 66d per pound, and Egyptian yarns, taking 60s twist, are about one-fifth the price, say 31d, against 151d. On the same comparison F. M. American today is 9.27d, against 32.41d, and F. G. F. Sakellaridis 16.50d, against 99d per pound.

What cloth prices are it is most difficult to say, so great is the irregularity, even in the staple lines. Unless a manufacturer were approached with an order in hand he probably would not quote a definite price at all. And on the other hand, many of the bids now being made can hardly be in earnest, being so much below what current business is passing at. China and India are

DEAL DIRECT WITH THE MANUFACTURER

noticeable offenders in this respect and advices from these two outlets explain why. Distribution in both is bad, with silver and exchange rates against them. Conditions in India may be indicated by a formal request made by the Delhi Chamber of Commerce to the Manchester Chamber of Commerce that Lancashire should suspend shipment of cotton goods to India for the next six months or until the rupee recovers to 2 shillings value.

It is cheering under such conditions to find that the optimists are not all dead, and that some of them are alive in quite high places. The president of the Manchester Chamber of Commerce, for instance, refuses to be depressed. He is sure that "The sun still shines although the sky be a grey one" and that the time when it will break through is near at hand. This is (in part) what he says: "The production of Lancashire is essential for the supply of the world's demands. We have nothing to fear from legitimate and fair competition. There is no portion of the world's productive power which is more likely to reassert itself than that of our great cotton industry. It is undoubtedly quite clear that the depression in textiles has arisen, not through overproduction, but owing to the changing conditions of trade. Financial stringency and the disorganized state of foreign exchanges have been serious factors in causing the stagnation of trade, but these are temporary difficulties, and I am justified in stating that a big shortage of cotton goods is being created, which must in the near future need replenish-

ing to satisfy the consumer's essential needs. One extreme begets another, and the present condition of extreme depression will inevitably bring about a period of extreme prosperity."

The Board of Trade returns for January bear out the statement that the world must be running short of cotton goods, the total export of these for the month being but 249,360,000 square yards only. In January last year 414,757,000 square yards were exported, and in January, 1913, 648,913,000 linear yards.

#### U. S. Imports Much Wool.

Roanoke, Va.—Addressing the Virginia Sheep and Wool Growers' Association here, George Willingmyer, wool specialist for the United States bureau of markets, declared that 600,000,000 pounds of wool is consumed annually in the United States, half of which amount is produced in this country.

According to Mr. Willingmyer, 300,000,000 pounds of wool is imported to the United States every year from South America and Australia.

"Isn't Jack just wonderful?" said the young wife, speaking to her brother about her volunteer husband. "He's already been promoted to field marshal."

"From private to field marshal in two months? Impossible!" said the brother.

"Did I say field marshal?" murmured the young wife. "Well, perhaps it's court-martial. I know it's one or the other."

## Shambow Shuttles

**R**E-INFORCED with Red Vulcanized Fibre will outwear the best plain wooden Shuttle two in one and increase loom production and maintain, if not actually improve, quality. They will prevent an end an hour per loom from going down. Figure this out in additional loom hours added to your present producing capacity.

We are Southern Distributors for the SHAMBO SHUTTLE CO., of Woonsocket, R. I., and maintain in Atlanta a complete Service and Advisory Department, in charge of Mr. A. W. Angell, a direct Factory Representative, whose entire time is at the disposal of the Southern Textile Mills, to help reduce your Shuttle troubles to a minimum. Let us explain to you the advantages of using Shambow Fibre Re-inforced Shuttles and Picker Sticks.

## More Anniversary Congratulations

Atlanta, Ga.,  
March 5, 1921.

Mr. David Clark,  
Charlotte, N. C.  
Dear Mr. Clark:

I wish to extend to you my sincere congratulations on this, the tenth birthday of the Southern Textile Bulletin. Every man that is in any way connected with the textile field should feel proud of the fact that we have such a man to champion our cause.

The writer has always been proud of the fact that he numbers you among his personal friends. I hope that you will understand that I could not let this opportunity pass to extend to you my best wishes.

With kindest personal regards,  
Yours very truly,  
B. R. DABBS.

Cabarrus Cotton Mills.  
Kannapolis, N. C.  
March 8, 1921.

Southern Textile Bulletin,  
Charlotte, N. C.

Dear Sirs:

Heartly congratulations on your tenth birthday. Have watched your progress for the last ten years with pride, and have seen your paper grow to the best textile paper in America.

You have given us a paper that has been a help to all, both mills and employees alike. Your views and predictions are well founded and fearlessly spoken, and we, for one, want to thank you for what you have done in the South. We need

men like you, and may God spare you and your force for many more happy birthdays.

Yours very truly,  
CABARRUS COTTON MILLS.  
By C. M. Powell, Supt.

March 4, 1921.

Southern Textile Bulletin,  
Charlotte, N. C.

Gentlemen:

We find your publication extremely useful in a purely business way. Our textile salesmen all read it carefully and obtain from it a great deal of information which helps them to keep in touch with new prospects for the sale of electrical apparatus.

We also find your Directory of Southern Textile Mills and Cotton Oil Mills extremely useful. All of our salesmen carry copies of this directory with them. In our opinion these directories carry more information in a concise form than can be gotten in any other publication we know of.

It gives us great pleasure to wish continued success to the Southern Textile Bulletin.

Very truly yours,  
E. P. COLES, Mgr.

Gentlemen:

The writer has been a subscriber to the Southern Textile Bulletin for

## Reduce Your Fuel Bill One-Fifth

It's because the Morehead Back-to-Boiler System returns the water of condensation direct to boilers at high temperature—temperatures that prevent the operation of a steam pump—that hundreds of manufacturing plants are buying one-fifth less coal this year and have effected a 20 per cent saving year after year.

We have received scores of testimonial letters from Morehead users—letters which substantiate our claims of economy and increased efficiency through the use of the Morehead System.

Following is a letter received by one of our Southern representatives:

**Elmira Cotton Mills Co.**  
BURLINGTON, N. C.

Mr. Grant Estlow,  
Graham, N. C.

Dear Sir:—

Regarding the Morehead Steam Traps which we installed here several months ago, will say they are working very satisfactory; we are using them both on high and low pressure, with good results, and I think we had one of the worst conditions of draining in order to get all of our waste steam back to the traps that you are likely to run up against. We find that in addition to considerable saving in steam that we are able to cut out running our deep well pump which supplies all our water about four to five hours per day, which, alone, is a considerable saving.

Very respectfully,

J. G. KING, Supt.

We will gladly refer you to Morehead users in your locality. Write for catalog.

Dear Sirs:

We wish to offer our hearty congratulations on your tenth anniversary, and to extend to you our very best wishes for your continued success.

We believe that your paper covers a splendid field of usefulness, both to the cotton mill interests and to the textile machinery or supply business, and should have the hearty support of these interests.

We feel that we are amply repaid for the investments made in advertising with you.

Yours very truly,  
SACO-LOWELL SHOPS.

Southern Textile Bulletin,  
Charlotte N. C.,

Gentlemen:

We note that March 3rd is your tenth anniversary, and we wish to congratulate you on your tenth milestone and commend you for the splendid paper you have built up.

The work of the editor has been invaluable to the cotton mill industry of the South. He is a forceful

writer and untiring worker, always ready to censure the vicious and praise virtue, in an impartial way. Two striking examples appear on the editorial pages of the Textile Bulletin of Feb. 3rd.

A happy and successful future is our wish for you.

Very truly yours,  
CORRICANA COTTON MILLS.  
J. H. Hook, Supt.

**The Clayton Cotton Mills.**

Clayton, N. C.,  
March 3, 1921.

Textile Bulletin,  
Charlotte, N. C.

Gentlemen:

Through an oversight I failed to notice your notice of "Our Birthday" until this morning, and while it is too late for your anniversary number, I just want to voice my appreciation of Mr. Clark's efforts anyway.

I appreciate all that Mr. Clark has done to help the cotton mill business, and I especially appreciate his editorials every week. I may not find time to read the paper all through every time but I read his editorials just as regularly as I read the editorials in the Charlotte Observer and have been greatly benefited by them.

I felt this morning just like I would if I had been receiving a letter of advice and information from a friend every week for ten years and had never answered him nor said anything to him about it.

Wishing you another ten years of success and usefulness, I am,

Very truly yours,  
A. SAM WHITE.

Charlotte, N. C.,

NORFOLK - - VIRGINIA

# Annual Meeting of the National Association of Cotton Manufacturers.

The annual meeting of the National Association of Cotton Manufacturers will be held at the Copley-Plaza Hotel, Boston, on April 20, 21 and 22. The meeting will open with a business session at 7:30 o'clock on Wednesday evening, April 20, when the president will deliver his address, and reports will be submitted by the secretary, treasurer, and reports will be submitted by the secretary, treasurer, and standing committees. At 8:30 the Scottish Musical Comedy Company will give "The Cotter's Saturday Night," during which these songs will be sung by well known soloists: "John Anderson, My Jo," "Laddie," "Hurrah for the Highlands," "Ye Bank and Braes," "Scots Wha Hae," "Duncan Gray," "Loch Lomond," "Annie Laurie," "Bonnie Mary," "O' a' the Airts," "West Thou in the Cauld Blast," "A Man's a Man for a' That," "The Auld Hoose," "The Lord's My Shepherd," and "Auld Lang Syne." The ladies and friends of members are cordially invited to be present at what promises to be a most delightful entertainment.

At 9:30 o'clock on Thursday morning, April 21, there will be a group discussion with W. Frank Shove as chairman on "Problems of Employment and Housing." William R. Bassett of New York will speak on "Labor Efficiency Through Good Will;" Robert L. Wilson, East Pittsburg, Pa., on "Employee Representation in Management;" and Leslie H. Allen, Springfield, Mass., on "Industrial Housing: A Burden on the Textile Industry." These addresses will be followed by a general discussion to be opened by George M. Dunlop of New York.

At 2 o'clock in the afternoon of Thursday, there will be a group discussion under the auspices of the Research Committee of the National Association, when there will be addresses by Alfred E. Jury of New York on "The Standard Specifications for Cotton Fabrics and Methods of Testing Adopted by the American Society for Testing Materials;" by Professor George B. Havens, Cambridge, Mass., on "The Effect of Moisture Upon the Tests of Cotton Fabrics and Yarns;" and by Everett H. Hinckley, New York, on "The Possibilities of Research on the Sizing of Cotton." There will be followed by an open forum in which those participating will be limited to five-minute talks.

At 9:30 o'clock on Friday morning, April 22, the Association medal will be presented by the chairman of the medal committee. At 10 o'clock there will be a group discussion with William L. Lyall as chairman on "Production and Sales Problems." There will be addresses by David R. Coker, Hartsville, S. C., on "The Common Interests of Grower and Spinner;" by Dr. Hollis Godfrey, Philadelphia, on "The Balanced Ration in Management;" and by S. H. Ditchett, New York, on "The Standardization of Textile Products," to be followed by a general discussion. At 2 o'clock on Friday afternoon there will be a session which will include addresses by

Franklin W. Hobbs, Boston, Mass., on "The Inter-dependence of the Textile and Dye Making Industries;" by Dr. Thomas Nixon Carver, of Cambridge Mass., on "The Right Regulation of Immigration;" and by E. Kent Swift, of Whitinsville, Mass., on "The Second World Cotton Conference."

The final business session will be

held at 4 o'clock on Friday, when the resolutions and nominations committees will submit their reports and officers and directors will be elected for the ensuing year. The meeting will close at 7:30 o'clock Friday evening with a banquet. President Russell B. Lowe will on this occasion serve as toastmaster, and the speakers, to be announced

later, will be of the usual rank and quality. As a hopeful experiment, it has been decided that the ladies of members shall be invited to participate in the banquet.

"Thankful? What have I to be thankful for? I can't pay my bills." "Then, man alive, be thankful you are not one of your creditors."

### Propose Reduction of Chadwick-Hoskins Capital Stock.

In a letter signed by President Spencer Turner, stockholders of the Chadwick-Hoskins Company are asked to attend a meeting in the company's offices in Charlotte, N. C., on March 15 for the purpose of voting on a proposal by the directors to reduce the capital stock of the corporation from \$5,000,000 to \$3,000,000, by the reduction of the number of shares of common stock from 200,000 to 120,000.

Although the corporation showed "a very fair profit" for 1920, Mr. Turner explains, readjustment of values and the necessity for a large tax reserve brought about a deficit in the mill's surplus account. It is for the removal of this deficit that the reduction in the capitalization is proposed.

President Turner's letter, and another explaining the refinancing plan, follow:

"In view of the drastic readjustment of business in practically every line of endeavor in this country, we believe that your company is open to congratulations on account of the fact that for the year 1920 it showed a very fair operating profit. This profit, however, was considerably less than had been hoped for, and for every reason expected, when you authorized the increase of the company's capitalization to its present basis.

"On account of the readjustment in values, which has brought about losses in both raw materials and finished product, and also because of the necessity of providing an unexpected tax reserve of a very considerable amount, there has resulted a deficit in the surplus account.

"It is the desire of your directors to make such adjustments in the amount of stock now outstanding that this deficit will be removed and a substantial balance will appear in the surplus account.

"To accomplish this it is proposed that the amount outstanding of common stock be reduced from \$5,000,000 to \$3,000,000 by the reduction of the number of shares outstanding from 200,000 to 120,000. This will reduce the amount of stock now held by any individual in the proportion of ten (10) shares to six (6) shares.

"We firmly believe that this plan, as outlined in the accompanying letter, will appeal to you as being a highly conservative move and one that will tend to be of great benefit to both the company and its stockholders, common as well as preferred.

"Very truly yours,  
(Signed) "Spencer Turner,  
"President."

#### Notice of Meeting.

"Notice is hereby given pursuant to the by-laws and in accordance with the resolution of the board of directors adopted at their meeting on the 15th day of February, 1921, that a meeting of the stockholders

of the Chadwick-Hoskins Company will be held at the company's office in Mecklenburg county, N. C., in the city of Charlotte on the 15th day of March, 1921, at 12 o'clock noon, for the purpose of considering and passing upon amendments to the charter or certificate of incorporation of the company, according to the resolutions of the board of directors, adopted at their said meeting, which resolutions are as follows:

"Resolved, That it is advisable to amend the charter of certificate of incorporation of the Chadwick-Hoskins Company in the following respects, to wit: (1) To reduce the common capital stock now issued and outstanding from \$5,000,000 to \$3,000,000, the reduction to be carried out by reducing the number of shares from 200,000 to 120,000, leaving the par value of each share of \$25 unchanged; (2) By striking out the sixth section of the certificate of incorporation, which provides that the preferred stock shall have voting power, the present issue of preferred stock not to be affected by this amendment; (3) By extending the corporate existence to 60 years from the date of the amendment.

"Resolved further, That a meeting of the stockholders of the company to take action upon the amendment mentioned in the foregoing resolution be called to be held at the principal office of the company, in Mecklenburg county, N. C., near the city of Charlotte, on the 15th day of March, 1921, at 12 o'clock noon."

"You are respectfully invited to attend this meeting and consider and take action on these matters. If you find it impossible to attend, please sign the enclosed proxy and mail it to undersigned so that your stock may be voted.

"Respectfully,  
"E. C. Dwelle,  
"Secretary."

### Chemical Works Reflect Renewed Textile Activity.

Charleston, W. Va.—Resumption of work in the textile mills of New England and the Southern States has had a beneficial effect in this section of West Virginia, because of the renewed demand for dyes. At least one of the large chemical plants, the Warner-Klipstein Company, of this city, which was closed down for several months, has resumed and now is running about two-thirds capacity. About 300 men are employed.

Garland P. Klipstein, of New York and Charleston, manager of the local plant, says that with present conditions continuing and with additional orders coming in, he expects to run full time within the next three weeks or a month.

Recently this firm made a contract to furnish 50,000 pounds of a dye for coloring turbans used in India and other countries of the Far East.

This is the first order for dyes of this kind ever placed in the United States, it is said. All of this class of dyes before the war was manufactured in Germany.

### Look for Improvement in Spanish Textile Industry.

Madrid, Spain—There are no signs of improvement in the Spanish textile industry. However, there is a feeling of confidence that the serious crisis through which Spain is passing is only temporary, and that there will soon be an improvement, when the drop in prices of manufactured goods is regulated, in proportion to those in effect when the drop began. The windows of the leading stores and shops are filled with bankruptcy stock on sale at prices varying between 40 per cent and 50 per cent below figures previously ruling. The liquidation and marked-down sales are more numerous in the women's section, the ready made clothing section and the hosiery section.

As regards Catalonia, the Spanish textile manufacturing center, the situation is certainly very critical. Unemployment is increasing daily, and there was a considerable number of factories and workshops closed. The scarcity of work in this district is due in some cases to the lack of orders, and in other cases to great shortage of raw materials. There are as many factories in the capital as in the provinces that work only three days a week, and some even intend closing down temporarily, inasmuch as the reduction in the price of white material has amounted to 40 per cent.

When the Bank of Barcelona suspended payments on December 27, the general opinion was that such a measure would not be of long duration. The task of reconstruction of the Banco de Barcelona is now under way, but proceeding very slowly, owing to the fact that there is much delay in the liquidation of credit upon merchandise. The commission in charge of studying the problem has drawn up its report. The solution which this report proposes is to increase the capital of the Banco de Prestamos y Descuentos, whose stock is owned by the Banco de Barcelona from four million pesetas, which it has at present, to the respectable sum of forty million pesetas, so that the Banco de Prestamos y Descuentos may be responsible for part of the depositors of the Banco de Barcelona. The Banco de Barcelona will advance to its creditors 50 per cent of the gross amount until it is prepared for reorganization and can arrange total payments for all its creditors who are claiming eighty million pesetas in national currency without counting the foreign money.

By means of this solution and the increase of the nominal capital of the Banco de Prestamos y Descuen-

tos for local economy, a considerable part of the deposit can be returned into circulation. At first it was thought that the Banco de Barcelona itself would offer an immediate percentage to its depositors, and the remainder in a prudential period of time, but great is the difficulty in fixing an equal percentage and in gaining the union of all its creditors in a country where the personal element is so important.

### Summer Cottage of W. G. Sirmine Destroyed by Fire.

Greenville, S. C.—The W. G. Sirmine cottage, together with several barns and outbuildings and a large quantity of timber, was destroyed by a fire which swept over Paris Mountain Thursday night. The fire, which raged throughout the night, was said to be the worst since the hotel was destroyed several years ago.

But for the efforts of eight men who fought the flames throughout the night it is thought that all of the summer cottages on the mountain would have been destroyed. The flames originated on the north side of the mountain, but in some unknown manner gained headway before any effort to check them were made.

Mr. Sirmine is president of the Southern Textile Exposition.

### Greer Mill Worker Fires Fatal Shot

Greenville, S. C.—James Newman, 26, a worker in the Victor Cotton Mill at Greer, was shot and killed Saturday afternoon by Charles Smart, a second hand in the mills' card room, the shooting taking place in Greer.

The exact cause of the trouble has not been determined, though it is known that some feeling had existed for several days. Smart met Newman walking on a railroad track early in the afternoon and there shot him.

# DOBBINS SOAP MFG. CO.

PHILADELPHIA

For Over Half a Century Makers of High Grade Soaps and Scouring Materials for Textile Manufacturers. Dobbin's Cotton Softener a Specialty

W. T. McLeod, President.

**The McLeod Leather Belting Company.**

The McLeod Leather and Belting Company has been organized and now has a complete modern manufacturing plant at Greensboro, North Carolina, for making high-grade leather belting. They expect to operate in all parts of the country, giving special attention to the textile mills in the South.

This corporation has been organized by experienced men, who are well known to the belting trade.

Mr. W. T. McLeod, who is president of the new concern, held the

same position with the Charlotte Leather Belting Company for a number of years and is thoroughly posted on the best methods of merchandising leather belting and leather products.

Mr. J. A. Schachner, who was vice-president and production manager of the Charlotte Leather Belting Company, will hold the same position with the new company, and is considered to be one of the best producers of high-grade leather belt in the business. He is a man of the highest type, very aggressive, and with a desire to build an article

which can not be surpassed in quality. He is well known to the textile mills of the South.

Mr. C. M. McClure will have active charge of the sales in the textile districts. He needs no introduction, as "Mac's" reputation for selling his customer high-grade goods and seeing that they get them cannot be questioned. Mr. McClure has been a mill manager himself, therefore is thorough familiar with the requirements of cotton mills.

The new company is well financed, having a capital stock of \$200,000, and enters the field with no inventory on hand, therefore, they have started with a clean slate, and with such men as this organization is composed of, we predict that they will show satisfactory results.

The new plant is located at No. 333 South Davie street, Greensboro, North Carolina.

J. A. Schachner,  
Secretary and Production Manager.

**Export Outlook Gloomy.**

Philadelphia—The Panama-Costa Rica war clouds and the extent to which the effect of a clash of the Central American republics might be felt in South American countries is giving some concern to hosiery interests operating in those markets. While, it is shown from export statistics, the two Central American countries about to engage in war imported only 126,606 dozen pairs of hosiery from the United States last year in the aggregate, it is feared war may seriously disturb this country's trade in a number of South American republics. Exports to Colombia were 249,978 dozen

pairs and to Venezuela 116,311. Including Argentina, Chile and Brazil, the year's exports to the countries already affected and those which it is feared may become embroiled totalled 1,487,780 dozens out of an aggregate of all exports of 12,386,695 dozens.

The outlook is the more disturbing because of conditions in Cuba, another large consumer of American hosiery, that country last year having bought 1,363,575 dozens—almost as many as the seven South and Central American countries combined.

Another possible factor in diminishing this country's more profitable export trade is the establishing of several hosiery factories in Australia; an outlet last year for 1,332,847 dozens. Australia took 11 per cent of the cotton and 7.3 per cent of the country's total exports. According to consular reports, Australia is to have within the next two years one factory which is to turn out 40 per cent of last year's imports from the United States.

Many exporters who have had unpleasant experiences in foreign markets in the last several months are not annoyed by either the Central American war cloud or the building up of a hosiery industry in Australia some time in the future. Mill executives who have discussed the export situation, present and prospective, say they simply will have to wait, as they did for several months for an improved domestic market, and will not abandon efforts to expand their business in foreign fields at the proper time.

### George W. Watts Dead.

Durham, N. C.—George W. Watts, one of the wealthiest and most successful citizens of North Carolina, died at his home here at 10:30 o'clock Monday morning, after an illness of many months. The cause of death was stomach trouble.

Mr. Watts was born at Cumberland, Md., August 18, 1851, a son of Gerard S. and Ann E. (Watts) Watts. He was reared at Baltimore, attended the public schools there from 1859 to 1868, and from 1868 to 1871 as a student of civil engineering in the University of Virginia. However, it was along manufacturing and industrial lines that his career was made.

Mr. Watts was interested in practically every development and enterprise of the city for the past 30 or 35 years. He was president of the Pearl Cotton Mills, vice-president of the Erwin Cotton Mills, a director of the Seaboard Air Line Railway; vice-president of the Golden Belt Manufacturing Company; Mayo Cotton Mills, at Mayodan, N. C.; the Cooleemee Cotton Mills; the Golden Belt Bag Manufacturing Company; the Durham Loan & Trust Company; director of the Virginia-Carolina Chemical Company; Southern Cotton Oil Company; Republic Iron and Steel Company; vice-president of the Home Savings Bank, and many other important and growing industries.

On October 19, 1875, he married Miss Laura Valinda Beall. The only daughter by this union is the wife of John Sprunt Hill, of Durham. Mr.

Watts married the second time on October 25, 1917, Miss Sara V. Ecker, of Syracuse, N. Y.

### Install Automatic Telephones.

The Nicholson Bank and Trust Company at Union, S. C., of which Emelie Nicholson is president, has just installed a 14-station Select-O-Phone system and the Hickory Chair Manufacturing Company has purchased a Select-O-Phone outfit for its plant, according to H. M. Mays, who is now making a trip through the South in the interest of the Screw Machine Products Corporation, Providence, R. I., manufacturers of the Select-O-Phone automatic telephone and man finding system. Many mills in the South are equipped with these automatic outfits.

### Textile Plants Close in Spain.

Barcelona — Twenty-four textile factories have closed in consequence of the crisis in the cotton trade, according to information furnished the regional district officials. Eight thousand employees of these factories have been thrown out of work. Announcement is made that 50 other textile factories have introduced half time, affecting 8,000 more workers.

Despite the recent limitation of hours in factories, all warehouses continue overstocked with goods as a result of the action of the buyers who are awaiting a reduction of prices, which the producers decline to concede.

## COTTON MILL COMPRESSION COUPLINGS

of the DOUBLE CONE TYPE are of strong construction, easily applied to, or removed from shafts. The ideal coupling for cotton mills.

MILTON G. SMITH, Southern Sales Agent, Greenville, S. C.

# Why The Textile Industry Needs Powers Automatic Thermostatic Regulators

The Powers Regulator No. 15 for Air Temperature Control

The scientifically correct temperature control that results from the installation of **Powers Thermostatic Regulators** is advantageous in many ways.

By limiting the heat to the precise degree required, it saves steam.

A constant temperature in the dye bath, such as a **Powers Regulator** assures, prevents streaked places; eliminates seconds or sub-standard goods.

In scouring, automatic regulation of temperature positively prevents discolored, harsh, or tender wool. The same is true in rinsing and washing.

Automatic heat control prevents tearing when drying in the piece.

In sizing, even weight and strength are assured by **Powers Regulators**, while boiling in the size box will never occur. Broken ends and chafing are largely eliminated.

## The Powers Regulators, Nos. 11 and 15

Self-operating regulators especially designed to control liquid and air temperatures. Very sensitive, accurate and reliable. Adjustable at will over a range of 40 degrees; easily installed; invaluable for fabric and raw

stuff washing, dyeing, drying, sizing, etc. Prevent overheating with consequent loss; make it possible to standardize products, save coal, material and labor.

### Letters About Literary Digest Article on Child Labor.

Feb. 23, 1921.

Mr. David Clark, Editor,  
Southern Textile Bulletin,  
Charlotte, N. C.

Dear Sir:

I have been traveling a good deal of late, and your letter of January 31, 1921, addressed to the University of Wisconsin, reached me only a few days ago.

The quotation from the Literary Digest, which I saw for the first time a few days ago, is from Chapter II of a book entitled "Labor Problems," written by Miss Helen L. Sumner and myself in 1904, and published in 1905. It has never been revised or changed since. As appears from the index, Chapter II was written by Miss Sumner, now Mrs. R. M. Woodbury.

I agree with you that in any application to present conditions the statement is inaccurate and misleading. Based not upon first-hand information but upon statements and carefully obtained evidence of persons who knew conditions thoroughly when the book was written, my opinion is that the movement of what you call the "mountain people" into the mill towns has been for them an upward step, but that to induce these people to come and to keep them in the mill towns employers have sometimes, against their own judgment, acquiesced in condition regarding child labor which were lower than the standards maintained by the most advanced states.

Yours very truly,

T. S. ADAMS.

Feb. 23, 1921.

Mr. John H. Howarth, Asst. Supt.,  
Lanett Cotton Mills,  
West Point, Ga.

Dear Sir:

Your letter of February 7, 1921, addressed to the University of Wisconsin, has, after some wanderings, just reached me here. I am very much indebted for your letter, and particularly for the very attractive pamphlet dealing with "Lanett, the Village Beautiful." I also regret exceedingly the publication of that excerpt in the Literary Digest which only came to my attention a week or so ago. It was not from an article by myself, but from a book published by H. L. Sumner and myself in 1905. The manuscript was written in 1904 and the book has never been revised or the plates changed. This particular excerpt is from a chapter written by Miss Sumner, who is now Mrs. R. M. Woodbury, as appears in the index to Chapter II.

I quite agree with you that the statement as in any way reflecting present conditions is inaccurate, unfair and misleading.

Yours very truly,

T. S. ADAMS.

Charlotte, N. C.,  
March 1, 1921.

Prof. T. S. Adams,

415 Everett St.,  
New Haven, Conn.

Dear Sir:

Yours of 23rd to hand and I am very gratified to know that the article quoted in the Literary Digest was one written by yourself in 1904 and published in 1905.

It was of course unfair on the

part of the party who compiled the article for the Literary Digest to use such a quotation without stating that it represented conditions 16 to 20 years ago. I have no doubt, whatever, that it was an intentional misrepresentation, such as has been the habit of the National Child Labor Committee in the past.

I appreciate very much your letter and am glad to know that you are in no way responsible for the impression that was conveyed by the article in the Literary Digest.

Yours very truly,

DAVID CLARK.

Charlotte, N. C.,  
March 5, 1921.

Managing Editor,  
Literary Digest,  
New York City.

Dear Sir:

On date of February 3rd you wrote us relative to the article that appeared in the Literary Digest on the subject of "Child Labor" and we have been expecting to hear something further from you as soon as you heard from its author.

Since writing you we have received a letter from Prof. T. S. Adams stating that the extract was from a book published by him in 1905 and expressing his opinion that the use of his statement without referring to the date of same was inaccurate, unfair and misleading, in which we heartily agree with Prof. Adams.

I do not know who prepared the article for the Literary Digest, but will risk a very large bet that it was written by some person connected with the National Child Labor Committee.

Under the tutelage of the late A. J. McKelway, the National Child Labor Committee became the most expert organization in the world in the matter of creation of false impressions without actually making false statements. We know that he had some very apt students in that organization.

With the exception of Owen Lovejoy, Northern secretary of the National Child Labor Committee, who has never hesitated to deliberately make false statements whenever he thought he was in a locality where no one could disprove his statements, it has been the regular policy of the employees of the National Child Labor Committee to create false impressions by the jockeying of statements and information.

These may appear to be strong statements, but they are nevertheless the truth and we can prove same from almost any document ever issued by the National Child Labor Committee.

We realize, of course, that there are many true and sincere people who contribute to the support of the National Child Labor Committee, and our statements do not refer to them, but to those who have conducted their affairs.

The author of the article in the Literary Digest, about which we wrote you, desired to create the impression that children of 6 and 7 years of age were being employed in Southern cotton mills today. He or she did not dare to make that statement, but in order to create

that impression upon hundreds of thousands of your readers, and especially upon the school children for whom the article was prepared, used an article published in 1905, which, of course, dealt with conditions prior to that time. As Prof. Adams says, the use of that article was unfair and misleading and we know that the Literary Digest will agree with him. We charge that its use was a deliberate and wilful attempt to misrepresent conditions.

There are no children under 14 years of age employed in the cotton mills of the South today and they cannot be so employed by the law of each individual state, even if there was no Federal Child Labor law. We believe that the conditions in the Southern cotton mills, while not ideal, are better than those of any large industry in this country, and will be very pleased to have you send a representative to investigate the conditions of the cotton mill industry of the South and will see that you have full access to our cotton mills.

If you feel that the sending of a representative for this purpose will entail more expense than you feel would be justified, we will be glad to pay the expenses of your representative and will afford him or her every opportunity for investigation.

The only condition that we put upon the sending of such representative is that you send one who has a fair mind and is willing to publish the truth and who has never studied the art of misrepresentation, such as is a feature of the National Child Labor Committee work.

Yours very truly,

SOUTHERN TEXTILE BULLETIN.  
David Clark Editor.

### Facts About Cotton.

Marlboro county, South Carolina, claims the distinction of averaging production of more cotton to the acre than any other county in the United States.

Ellis county, Texas, in total number of bales produced is the banner cotton growing county of the United States.

The per acre yield, average for the United States, has varied from 145 pounds of lint in 1781 to 224 pounds in 1914. The 10-year average is 182 pounds.

Egyptian yield of cotton averages 390 pounds, about to the acre. Cotton production in Egypt is limited to irrigated acres along the Nile.

The area under cotton in India about 25,000,000 acres—covers such a wide climate range that at many seasons of the year planting and picking are going on in different parts of the country at the same time.

Cotton is grown in Asia as far north as the latitude of Chicago.

There is now enough cotton in the world, unspun, to last nearly two years.

The Civil War was fought in the cotton fields of the South, destroying temporarily the means of supply. The recent world war was fought in the great factory districts of the world.

There is now more cotton in the

(Continued on Next Page)

## Personal News

James A. has resigned as overseer of spinning at Couch Mills Co., East Point, Ga.

Jack Hite is overseer of spinning at Hannah Pickett Mills, Rockingham, N. C.

C. M. Bowden has been appointed overseer of spinning at the Payne Mills, Macon, Ga.

Edward J. Ashe has been elected general manager of the Cherokee Mills, Knoxville, Tenn.

Jackson Boynton has been appointed superintendent of the Prattville (Ala.) Cotton Mills.

A. C. Brown has resigned as overseer of spinning at the Harmony Grove Mills, Commerce, Ga.

M. B. Melendy has resigned as president and manager of the Cherokee Mills, Knoxville, Tenn.

S. A. Jones has resigned as overseer of carding and spinning at Red Springs Cotton Mill, Red Springs, N. C.

J. E. Harris has been promoted from superintendent to agent at the Tallassee Manufacturing Company, Tallassee, Ala.

J. H. Rhodes, formerly with Diamond Cotton Mills, Salisbury, N. C., is now erecting pickers for Saco-Lowell Shops.

C. C. Armstrong, Gastonia, N. C., president of the Armstrong group of mills, is improving after an attack of acute indigestion several days ago.

W. N. Pate is overseer of carding at Hannah Pickett Mills, Rockingham, N. C., and not overseer of carding and spinning as stated last week.

C. J. Huss, former superintendent and manager of the Osage Manufacturing Company, Bessemer City, N. C., is now with James & Co., yarn merchants, of Gastonia, N. C.

E. N. Carter has resigned as roller coverer at Erwin Cotton Mills No. 3, Cooleemee, N. C., and has accepted a similar position with the Kesler Manufacturing Company, Salisbury, N. C.

Geo. D. Simpkins, Sr., has resigned as overseer of spinning, spooling and warping at Consolidated Textile Corporation, Pelham (Ga.) Division, and accepted position as overseer spinning, twisting and spooling at Willingham Cotton Mills, Macon, Ga.

### Facts About Cotton

(Continued from Preceding Page.) stocks of any one of half a dozen cotton markets in the South than was produced in all of the United States a hundred years ago.

More than three bales of cotton, averaging 500 pounds in weight, have been grown on a single acre in South Carolina.

The estimated number of working cotton spindles in the United States is about 35,000,000 of which 15,000,000 are in cotton growing states.

The largest cotton crop ever planted in the United States was 47,458,000 acres in 1913, which yielded 14,156,486 bales, 500 pound equivalents, of lint.

America's greatest crop of cotton—16,134,930 bales was grown on 36,832,000 acres.

The knowledge of cotton growing wild in islands of the West Indies is as old as the history of their discovery by the Spaniards in 1492.

Arkwright, Hargraves and Crompton are the great names connected with invention of cotton spinning machinery. They were Englishmen.

Eli Whitney, an American, invented the saw gin. The original patent was March 14, 1794.

On account of the labor involved in separating the lint from the seed by hand, cotton was of unknown commercial importance prior to the invention of Whitney's gin.—Gastonia (N. C.) Gazette.

### SYDNOR PUMP & WELL CO.

Richmond, Va.

Supplying Cotton Mills with Water for 30 Years

### Say---Mr. Mill Man! Business is going to pick up first thing you know.

Why, just last week we took a little trip and received an order for several hundred feet covering for underground steam lines. Took several other orders—and just this week in comes another order from one of our customers for car load.

Make your repairs now—you'll soon be too busy filling orders yourself and wonder why you didn't repair your plant sooner.

#### Remember.

We sell Pyro-Bestos for covering underground steam piping and Asbestos and Asphalt slate surfaced shingles made by National Asbestos Mfg. Co. We sell Ehret's 85% Magnesia for covering high and low pressure steam lines. We sell AFCO non-climbable factory fence materials. We sell Neverfreeze covering, corkboard and granulated cork, playground equipment and paint for both interior and exterior use. Send us your orders now.

CHARLOTTE, N. C.

## CONSERVATION

THROUGH

## PRESERVATION

As the available supply of the woods—such as long leaf pine—customarily used in mill construction and repairs, becomes scarcer and higher in price each year, is it not logical to think of getting the most possible out of the wood used or of substituting a cheaper wood?

Many textile plants have seen the light and are treating the long leaf pine, maple and other costly woods to increase the life many years. Others are substituting poorer quality woods, thoroughly and properly treated with a proved wood preserver and thereby aiding the Conservation problem, saving in lumber costs and securing results that are satisfactory from all standpoints.

Hundreds of Mills, Public Service Corporations, Railroads, Etc., have adopted "No-D-K" as the proved and standard Wood Preserver.

HAS YOUR PLANT?

Charlotte, N. C.

W. D. McNeill and D. H. Jones of Fayetteville, N. C., are in charge of the designing and constructing and will operate the plant when completed.

The mill will be equipped with the very latest machinery for making ply yarns, paralleling machines will be used instead of spoolers.

Kingsville is located in the fertile fields of South Texas on the St. L., B. and M. R. R., and with its abundant supply of natural gas, oil fields, splendid water and ample supply of labor, bids fair to become a city of great importance.

## Arkansas Mill Project.

Little Rock, Ark.—Plans of the Arkansas Cotton Mills Co., recently mentioned as being incorporated for \$3,000,000, as noted, with the purpose in view of establishing a chain of cotton mills in this State, called for the erection of a central plant, probably in this city, states T. W. Campbell, secretary and treasurer of the new company.

A chain of large, modern mills will then be placed at central points in the cotton areas of the State, such as Hope, Brinkley and Hoxie, at an average cost of between \$200,000 and \$300,000 each. These mills, it is stated, will take up the raw material, practically from the field, for the manufacture of "a high grade cloth," details of which have not yet been disclosed.

The company in its plans has figured upon the development of hydro-electric power in the State, through such projects as the Little Red River dam, now nearing completion near Searcy, Mr. Campbell said.

The company will spend the present year in completing its financial organization, Mr. Campbell said, and will sell shares at \$10 each to the farmers, merchants, bankers, business men and others.

"The directors of the new company are men of substantial financial interests," Mr. Campbell said, "who are convinced of a great future for the textile industry in Arkansas."

The board of directors includes E. Dalton, president, an extensive planter and stock raiser, president of the Randolph County Bank and owner of the Ozark Telephone Company; Dr. Thorgmorton, vice-president; T. W. Campbell, secretary-treasurer, former assistant attorney general and attorney for the Arkansas Corporation Commission, now associated with Pace & Davis, attorneys of Little Rock; T. H. Wells, B. Borowsky, J. D. Wells, W. L. Pope, C. E. Suttle, E. R. Hicks and George Promberger.

## \$165,000 Cotton Plant Fire.

Atlanta, Ga.—The Royal Cotton Products plant here was destroyed by fire Thursday night, and the loss estimated by officials of the company is about \$165,000, all of which

was practically covered by insurance. The plant, a two-story brick building, was burned to the ground, and all machinery ruined, and about 4040 bales of linters and low grade cotton burned. The cause of the fire was not determined. W. B. Reeves, general manager, placed the cotton loss at \$75,000 and machinery at \$500,000. Officers of the company are: L. G. Neal, president; C. W. Lane, vice-president; W. B. Reeves, general manager, and L. S. Whitman, sales manager.

#### New Sulphur Blue.

H. A. Metz & Co., Inc., announce through their Charlotte office, in charge of J. D. Hunter, that they have brought out a new Sulphur Blue, known as Sulphur Blue 5 G. This color has great affinity for cotton fibre and dyes readily. The fastness characteristics is about the same as their Sulphur Blue 3 B. Products and dyed samples will gladly be furnished upon request.

#### Wilson Company Shows Rapid Growth.

The Wilson Company, organized in the autumn of 1917 by Mr. W. Lindsay Wilson, at that time purchasing agent of the American Machine & Mfg. Company, which has since removed to Atlanta, Ga., and conducted by him in connection with his other duties with other concerns in Greenville, has now its offices on the fourth floor of the News Building, Greenville, S. C.

The textile supply end of this business is being looked after, as in the past, by Mr. Wilson, he having severed his connections with every other business in Greenville, and devoting his entire attention to this particular business.

The building supply end, which has heretofore been in existence in charge of Mr. Wilson, for the benefit of other concerns with which he was connected, has been greatly largened and is now under the direct management of Mr. Edward McCrady, a structural engineer of wide experience and recognized ability.

The two departments are one and the same in every respect with the exception of the lines which they handle. The textile supply end will continue to represent exclusively in the South, the Keystone Fibre Company of Yorklyn, Del., manufacturers of the celebrated Peerless Roving Can, also cars, boxes and trucks.

oldest and largest in New England, is also represented exclusively by us in the South. In addition to this we represent the Jewell Belting Company of Hartford, Conn., whose product is so well known that we need say nothing further.

The Beckley Perforating Company of Garwood, N. J., manufacturers of perforated metal, wire machine guards, etc., etc., the National Steam Specialty Company of Chicago, which caters to the wants of oil mills as well as making steam room specialties, and the Horace G. Preston Company of Detroit, manufacturers of leather hydraulic packings, etc., are also represented exclusively in the South by the Wilson Company.

The building supply department caters to the wants of contractors and builders generally handling their structural steel requirements whether plain or fabricated, reinforcing steel (Havemeyer bars) brass and iron grilles, ornamental work for public buildings such as banks, churches, schools, etc., and other special work of this character.

Just at this time we are furnishing the material required in the new postoffice extension in Charlotte, N. C., and have a number of attractive contracts throughout the country. While this concern was organized only three years ago, yet in both the textile supply department and building supply department, it has among its customers some of the best concerns in the South.

While the men at the head of both of these departments are both young in years, they are old in experience and it is fair to say that the future promises many good things for them, having built up a reputation that is indeed enviable.

New Orleans, La.—Urging jail sentences for speculative short sellers of cotton who, he says, will bankrupt the South unless they are prevented from "playing their nefarious game," W. B. Thompson, chairman of the Louisiana Division of the American Cotton Association, wired Senator J. T. Ransdell at Washington Sunday.

Mr. Thompson's telegram was in answer to a wired suggestion from J. S. Wannamaker, president of the American Cotton Association. Mr. Thompson also wired the other Louisiana delegates in Washington, asking their co-operation and prompt action in curbing the speculative operations, by invoking the Smith-Lever act, through the United States Bureau of Markets.

Mr. Thompson in his telegram admits that in ordinary times, when the future system functions normally, it is an indispensable adjunct of the cotton trade.

"In extraordinary times," he wired, "it may become an instrument of great harm and its operations should be regulated."

He proceeds with an explanation that in the present condition of restricted demand the future trading system, as operated, has been detrimental. This, he says, has left the future market wholly at the mercy of bear speculators, who have only to sell for future delivery cotton they did not own. The buyers' hands being tied by conditions, this naturally caused declines.

Spot holders have been frightened, he points out, into selling hedges, accentuating the weakness of the contract market and demoralizing the spot market. Under these conditions, Mr. Thompson declares, there has been no bona fide spot market, and bankers holding cotton as collateral have had to guide themselves by the bear-controlled future market. These bankers have called for margins, which still further weakened spot situation.

The speculative short sellers, taking advantage of the declines, Mr. Thompson goes on, bought in their contracts and pocketed their profits, causing a slight advance in the market, only to jump in again and drive the market down to new levels with short sales.

With clocklike regularity these operations have been repeated, Mr. Thompson declares, until prices have been beaten down to ruinous levels. The whole South is in distress and cotton producers are in actual want of necessities. But not satisfied, these short sellers are talking about 8-cent cotton.

"The declines of the past week, in my opinion," he declared, "have been engineered by a party of speculators now luxuriating at Palm Beach, Fla. The time has come when their operations should be stopped. In my opinion, the men who sell short contracts for speculative gain ought to be in jail, or at least prevented from playing their nefarious game."

Mr. Thompson makes it plain that he would not stop the selling of future contracts or destroy the future contract market. A future market

by the cotton merchant to protect his purchase, he said, is all right and necessary.

The argument that a big speculative short interest is the best foundation for a bull movement, he says, is true, but he points out that despite the widely advertised short interest, the market in the past few months has declined nearly 30 cents a pound. The short interest has been liquidated from time to time and the profit used for still further depreciation of prices, he says.

"The big thing to be done is to halt this system of annihilation before the South is bankrupt," he declares, and adds that he is not quite sure of the best means of accomplishing it. He suggests that the Department of Agriculture, through the Bureau of Markets under the Smith-Lever act, might get results by imposing severe penalties on the purely speculative seller and his broker.—Daily News Record.

"Madam," said the saleslady, "you say you want a narrow man's comb?"

"No! I want a comb for a fat man with rubber teeth."

## Knit Goods

Philadelphia—Reports coming to local and manufacturing interests indicate that the public is buying considerable hosiery that does not go through the hands of the retailer. In several of the larger manufacturing cities idle operatives and those employed part time are said to be selling the products of their several mills through the door-to-door method. Instances are reported of operatives conducting such a campaign turning in from \$150 to \$200 a day for silk hosiery, and sales in like amounts being made by mill help calling on the smaller jobbers with general lines of low end and medium type hosiery.

In one city a small pobber who formerly depended on the retail trade exclusively now is said to be selling to consumers through agents of whom 20 are employed. But for this method of distribution, the principal of this house says, he could not maintain his store. Retailers in this city prevailed on the authorities to compel him to take out a retailer's license.

A number of manufacturers are reported to be selling underwear to anyone that wants it, regardless of whether buyers are jobbers, retailers or consumers, and in a Pennsylvania city of 100,000 population where a store was established as a direct outlet for the product of a group of manufacturers, sales of hosiery alone are said to have averaged between \$13,000 and \$14,000 a month for the ten weeks that the establishment has been doing business.

"The public does not have confidence in retailers' prices," said a manufacturer, selling through this store, "and would buy more freely if prices were no higher than necessary for giving dealers a fair profit. Our prices show a profit with which the retailer ought to be satisfied, just now, at any rate."

A mill representative exhibits a pair of mercerized half hose for which he paid a retailer 75 cents. The stocking cost the merchant less than \$4 a dozen.

Manufacturers who admit they some time ago put prices under those of competitors and tried to get along without profits, for the time, say investigation disclosed their hosiery was being sold to the consumer at the same prices as that bought from other mills at higher figures, and that as their effort to promote

buying by the public proved a failure, at their expense, they have turned to the consumer as their customer, selling less hosiery, but getting a profit on what they do sell.

A commission agent who now is selling to retailers received last week the smallest orders that ever came to his desk, he says. Three orders, all from a western city, averaged \$50. The larger, for \$65, called for a total of seven styles of hosiery and underwear. "This is coming down to a mail order business," he says, "and calls for cash remittance with the order."

### Hosiery Mill Gets No Orders.

Spartanburg, S. C.—Hiram Kirby, manager of one of the local hosiery mills, states that while they have resumed operations, he cannot say how long they may continue to run. Mr. Kirby said that there is no market for the output and that they are piling up goods.

## Cotton Goods

New York.—The disastrous condition of raw cotton has brought about a universal break in confidence and an almost stagnant condition in cotton goods markets. Primary markets are quiet and weak and jobbers are buying in very small lots for prompt shipment only.

Some houses are inclined to look for further business on finished goods at new prices nearer a parity with the low values reached on certain gray goods. For 4-4 64x60s it is now possible to do as well as 10c in the best houses. One of the branded lines of 4-4 72x76s may be had at 12½c. Revisions of many branded bleached muslin prices are inevitable before many days unless there is an upward movement in gray cloths, as some agents look upon January prices as wholly out of range today. Printed percales are no higher than 12c for 4-4 64x60s, light grounds, and some houses have charged goods up at 11½c, with the understanding that any memorandum orders placed will not be above that price if deliveries are wanted in the near future. It is stated that the corporation printers are still willing to do rather better than many of the converting houses will undertake to do.

Ginghams are better sold than many other colored yarn cottons and the demand for spot goods is steady enough to take care of anything that comes to hand of a desirable character. The cutters appear to be doing better than for some time with gingham, especially when they can lay their hands on some of the neat, small patterns in dress gingham. Good qualities of working shirt chambrays are also being cut up fast in some houses, as finished garments are being offered to jobbers at prices that make them very desirable as quick sellers.

Competition for business among overall manufacturers is doing much to consume denim, and manufacturers of the better grades have no fault to find with the movement on past orders or with the immediate prospects. More business could come on some of the finer and heavier grades of hard spun yarn colored cottons without disturbing anyone, although some houses make no complaint.

The wash goods business is small in volume so far as individual orders go. At the same time, the totals of goods booked at the end of the week are not trifling in many places, especially where printed voiles, batistes, organdies or some of the novelty prints can be shipped at once. The jobbers are receiving steady small orders from road men covering a wide field.

Cotton ducks continue very dull, as low as 55 or 57 per cent off the list being quoted on wide duck for manufacturing purposes. There has been considerable talk of late of an improvement in the call for auto supply goods but it is more or less ephemeral, according to the houses here that sell most of them. There are so many unused goods held for the account of supply companies that an improved demand must continue for some time before it works into mill orders.

The decline in cotton has been a staggering blow to the cotton goods and cotton yarn industry, and curiously enough manufacturers are not finding comfort in the low price of their staple. They are taking the broader view of the effects of such a disastrous fall in values both upon their own merchandise and stock in hand, and the country in general.

There have been many instances of buyers who have asked that all goods due from March delivery be shipped at once. The export trade is still stagnant, the lack of volume orders for cotton goods for the manufacturing causes dullness in some divisions. First hands prices are as follows:

Print cloths, 28-inch, 64x64s, 5½c; 38½-inch, 64x64s, 7¼c; brown sheetings, Southern standards, 11c; tickings, 8 ounce, 20c; denims, 2.20's indigo, 17c; prints, 11c; staple gingham, 13½c; dress gingham, 15c and 17c.

Switzerland has nearly twice as many motor cars as were there in 1914.

# The Yarn Market

Philadelphia.—During the past week there has been nothing to indicate a better market for yarns unless it is the prospects of a greatly reduced acreage of cotton this year. An official report to February shows that 68 per cent less fertilizer had been sold than at the same time last year.

Cables from Manchester, England, say mills there are closed for 30 days. Spartanburg, S. C., spinners have called a meeting with the view of organizing drastic curtailment.

Thirties Southern carded cones have dropped below 30 cents a pound for the first time in nearly five years, and carded skeins and warps appear likely to follow suit. Twenties single carded cones are selling at 26 cents, with 20's single and ply carded skeins and warps already making a close approach to the price lately figured by local yarn experts as the ultimate low level for this count—25 cents a pound. Tens single carded cones are below 25 cents a pound, as are 10s single carded skeins and warps, while 10s-2 skeins and warps are down to 25 and 26 cents, respectively.

After considerable looking about, some of the yarn houses that were planning a selling campaign for the latter part of March have decided to postpone their efforts indefinitely. Inquiry develops the fact that no branch of the cotton goods industry appears to have reached a basis of stabilized prices on which to expect any sustained volume of new business. Therefore, it is argued, selling of worth-while quantities of yarn must await further readjustments among the various trades that are customers of this market. It is admitted that this may turn out to be an extremely slow process.

In short, while it is confidently believed that the cotton and cotton yarn branches of the industry have

reached a price level where improvement would be logical, were the rest of the industry in the same position, it is frankly recognized by leading local factors that the relative slowness in allied lines must be taken into account, and that patience will be a big asset during the next few months.

## Why a Morse Silent Chain

The Morse silent chain is used because of its superiority based on the design of the exclusive "rocker-joint" construction, the very highest grade of material and heat treatment, the extreme accuracy in manufacturing and the engineering assistance in the designing of textile drives by engineers trained in this particular line and backed by the long standing reputation of the MORSE CHAIN COMPANY.

DO YOU KNOW about the MORSE Line Shaft Drive,

Pioneer Steel Shaft Hanger

Light                      Rigid as a Rock  
Unbreakable          Full Range Sizes

The  
"SOUTHWESTERN IRON CLAD"  
is the IDEAL Cotton Mill Broom  
Only the best grade of broom  
corn is used in these brooms—they  
are built strong and will withstand  
the hardest usage.  
Note the light weight, yet strong  
and substantial shields used—this  
gives the broom ample protection  
and at the same time allows the  
proper amount of broom corn to be  
used, thus giving them excellent  
sweeping qualities.

Made in the following sizes  
No. 1—28 Lbs.—No. 2—26 Lbs.  
No. 3—24 Lbs.

## CINCINNATI LATHES

have every worthwhile convenience found in any other. You take no chances buying them, as these lathes have demonstrated in shops everywhere during the past fifteen years, their merits. Are furnished complete, ready for use, in sizes from 16 inches to 28 inches inclusive, in two foot lengths of bed from 6 to 30 feet long. After comparing prices and dimensions, you too, will be convinced that none offer as much for your money. Let us figure on your requirements.

## VICTOR MILL STARCH – The Weaver's Friend

It boils thin, penetrates the warps  
and carries the weight into cloth.  
It means good running work, sat-  
isfied help and one hundred per  
cent production.

We are in a position now to offer  
prompt shipments.
